👤 PROFILE

Backend-focused Software Engineer with **3 years of hands-on experience** in **Node.js, Express.js, MongoDB, JavaScript, and TypeScript**. Skilled in designing and developing **scalable, high-performance RESTful APIs and backend systems**, with exposure to **microservices and asynchronous, event-driven architectures**, aligned to evolving business requirements.

Strong expertise in the backend of the **MERN stack**, with working knowledge of **React.js**, and experience collaborating in agile teams to deliver clean, maintainable, and production-ready code. Known for problem-solving, adherence to best practices, and a **continuous learning mindset**, including recent exposure to **AI-enabled backend workflows**.

🧠 SKILLS

Backend & Architecture: Node.js | Express.js | RESTful APIs | Microservices | Event-driven & Asynchronous Programming | Authentication & RBAC

Databases: MongoDB | PostgreSQL | Neo4j (Graph Database)

Frontend (Working Knowledge): React.js | HTML | CSS | JavaScript

Cloud & DevOps: AWS (Lambda, DynamoDB, S3, SES, CloudWatch, ECR, AppRunner) | Docker | PM2

Programming & Tooling: JavaScript | TypeScript | Git & Version Control | Zod Validation | Prisma ORM | AI Tools & Prompt Engineering

📁 PROFESSIONAL EXPERIENCE

Xenett - Software Developer (AI-enabled Systems) Jun 2024 - Present | Ahmedabad, India

- Owned backend delivery for **Moniflo in production**, managing end-to-end sprint execution, feature rollout, and system stability in a live environment.
- Designed and implemented **Google and Microsoft OAuth authentication flows**, accelerating delivery using AI-assisted development while maintaining security and correctness.
- Delivered **multiple critical CRM integrations within tight deadlines**, handling API coordination, data mapping, and validation.
- Designed database models and APIs for core accounting features including **Inter-Company transactions, Clearing Accounts, and Complex Entries Checklist & Trend Analysis**.
- Resolved high-impact **production issues**, including P&L and Balance Sheet inconsistencies during SDK-to-REST migration, accounting upload failures, and a **memory leak**, improving system stability and accuracy.
- Stabilized backend services (**Xenett, Central, CP**) by upgrading NPM dependencies safely and improving developer productivity through **nodemon-based configurations** and test-case scaffolding.

BK Softech - Backend Engineer Jul 2022 - May 2024 | Jamnagar, India

- Developed and enhanced **production-ready REST APIs** using Node.js, Express.js, and Neo4j, focusing on modular architecture, validation, and performance optimization.
- Collaborated with senior developers to deliver features for **live client projects**, applying best practices in API design, data flow management, and error handling.
- Optimized database queries and data relationships**, improving API response times and reliability for data-intensive endpoints.
- Demonstrated strong learning agility by completing the **100 Days of Code challenge in 50 days**, contributing to continuous technical growth.

CERTIFICATIONS & TRAINING

100 Days Of Code - Web Development Bootcamp (Udemy)	Mar 2022 - Apr 2022
AWS Foundation Services & Generative AI Boot Camp (GTU Centre)	Jul 2025 - Sep 2025
Generative AI With JavaScript (ChaiCode)	Aug 2025 - Sep 2025

PROJECTS

Moniflo — Deal Management Platform

- Designed and built a **production-ready backend system** for deal, payment, commission, and invoice management.
- Implemented **end-to-end payment workflows** using Stripe, DepoSyt, and manual installment handling with automated validations and balance reconciliation.
- Developed **role-based access control (RBAC)** and event-driven backend APIs for Deals, Payments, Bonuses, and user flows.
- Implemented **automated PDF invoice generation** using Puppeteer for branded, downloadable invoices.
- Designed **high-performance MongoDB schemas**, optimized indexes, and eliminated loop-based queries to improve efficiency.
- Deployed services using **Docker and AWS**, integrating S3, SES, caching, and configuration services.

Xenett — Accounting Automation Platform

- Developed backend services for a **large-scale accounting automation system**, focused on scalability and maintainability.
- Refactored complex accounting logic to improve **accuracy and performance** for P&L and Balance Sheet calculations.
- Built a **serverless zip download API** using AWS Lambda and Archiver, improving file delivery efficiency by ~80%.
- Designed and implemented **event-driven email workflows**, enforcing permission-based and status-driven triggers.

The Patidars & LPS Jamnagar — Global Community Application

- Built a **scalable REST API** serving **1M+ users** using Node.js and Neo4j.
- Designed and optimized **graph-based data models** and Cypher queries for Business and People modules.
- Integrated third-party services for notifications, logging, and communication.
- Ensured high availability and stability across high-traffic endpoints.

Student Management System — MERN Stack

- Built a full-stack MERN application with **CRUD operations, pagination, and nested data relationships**.
- Designed backend APIs using Node.js, Express.js, PostgreSQL, Prisma ORM, and Zod validation.
- Developed responsive UI components using React.js and Material UI.

EDUCATION

Bachelor of Computer Applications (BCA)
Smt. CZMG BCA College

Jun 2019 - Apr 2022 | Jamnagar, India
